The steps may slightly vary depending on the car design.

Replacement: pollen filter – Honda Civic 8. AUTODOC recommends:

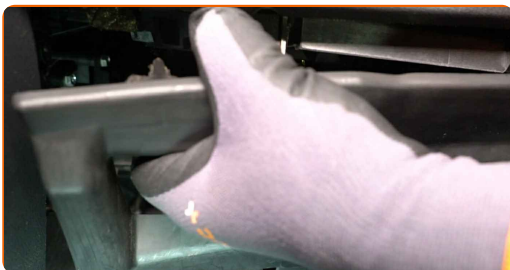

- Replace the cabin filter at least once every six months, in early spring and autumn seasons.
- Follow the terms, recommendations and requirements of the part operation provided by the manufacturer.
- If the air flow into the cabin has sharply reduced, replace the filter before a scheduled maintenance.
- All work should be done with the engine stopped.

**REPLACEMENT: POLLEN FILTER – HONDA CIVIC 8. TAKE THE FOLLOWING STEPS:**

**1** Open the car door.

**2** Remove the cover under the glove box.

**3** Remove the cabin filter housing cover.

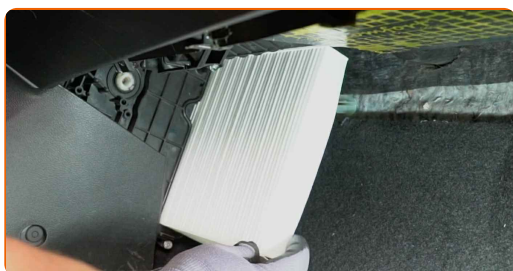

**4** Remove the cabin filter.

**AUTODOC recommends:**

- Do not attempt to clean and reuse the filter – this will reduce the quality of cabin air filtration.

**5** Install the new pollen filter.

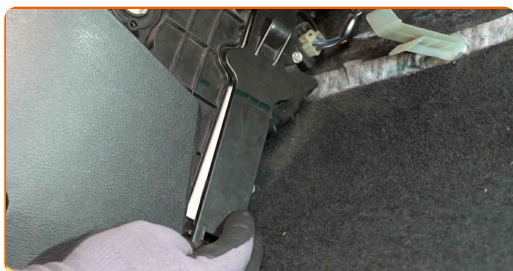

Replacement: pollen filter – Honda Civic 8. Professionals recommend:

- Follow the air flow direction arrow on the filter.
- Take care to only use quality filters.

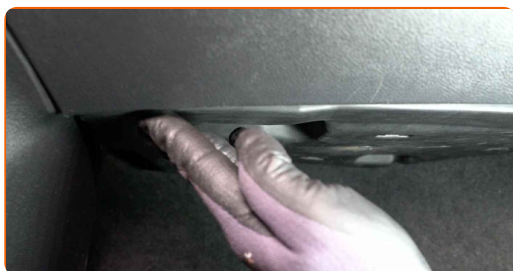

6

Install the cabin filter housing cover.

7

Install and secure the cover under the glove box.

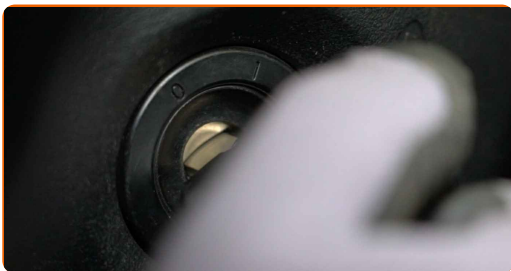

8

Close the car door.

9 Switch on the ignition.

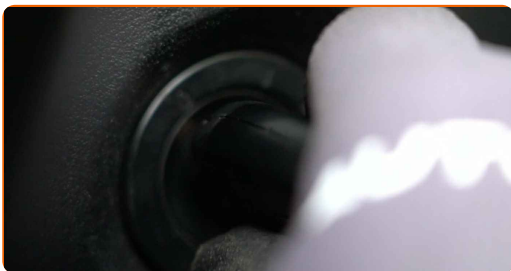

10 Switch on the air conditioning system.

Replacement: pollen filter – Honda Civic 8. Tip from AUTODOC experts:

- This is necessary in order to make sure that the component operates properly.

11 Switch off the ignition.

**WELL DONE!**
