BUY TOOLS

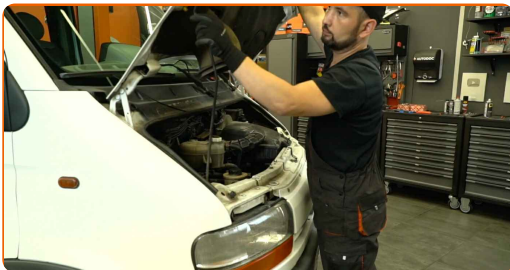

Replacement: engine mounts – Renault Master 2 van. AUTODOC recommends:

- All the work should be carried out with the engine switched off.

REPLACEMENT: ENGINE MOUNTS – RENAULT MASTER 2 VAN. USE THE FOLLOWING PROCEDURE:

1

Open the bonnet.

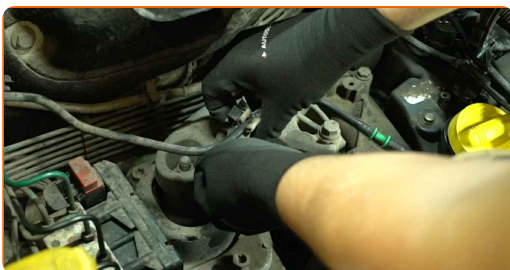

2

Use a fender protection cover to avoid damaging the paintwork and plastic parts of the car.

3

Disconnect the pipe from the engine mount bracket.

4

Support the engine in the area of the oil pan. Use a jack.

Replacement: engine mounts – Renault Master 2 van. Tip:

- Place a wide wooden block between the jack and engine to prevent the oil pan from being damaged.

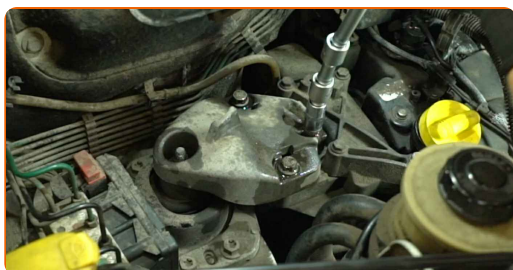

5

Clean the engine mount bracket fasteners. Use a wire brush. Use WD-40 spray.

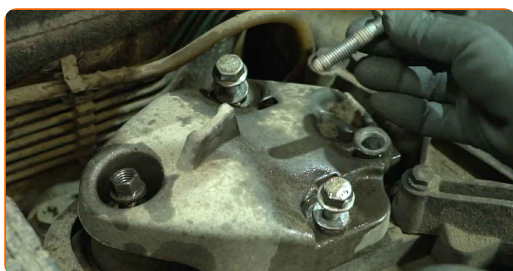

6

Unscrew the engine mount bracket fasteners. Use a 16 mm socket. Use a U-joint socket extension. Use a ratchet wrench.

7

Remove the fastening bolts.

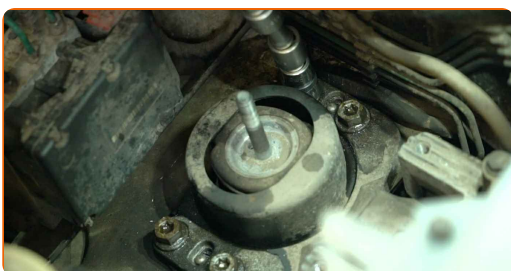

- 8 Remove the engine mount bracket.

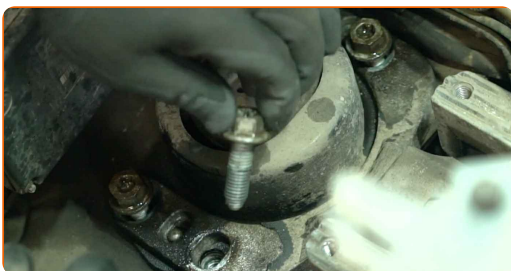

- 9 Clean the engine mount fasteners. Use a wire brush. Use WD-40 spray.

- 10 Unscrew the engine mount fasteners from the car body. Use an 18 mm socket. Use a U-joint socket extension. Use a ratchet wrench.

- 11 Remove the fastening bolts.

12

Remove the engine mount.

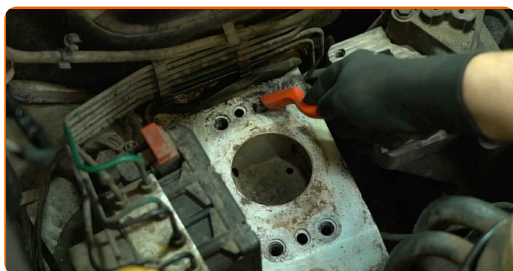

Replacement: engine mounts – Renault Master 2 van. Tip from AUTODOC:

- Carefully inspect the other engine mounts and replace them if necessary.

13

Clean the mounting seats of the engine mount. Use a wire brush. Use an all-purpose cleaning spray.

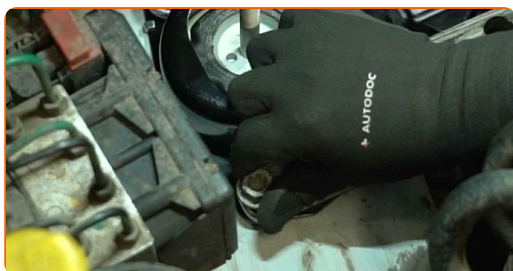

14

Install a new engine mount.

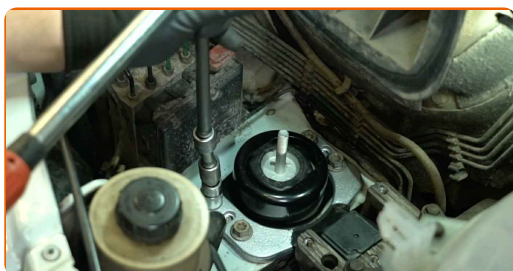

15

Install the fastening bolts.

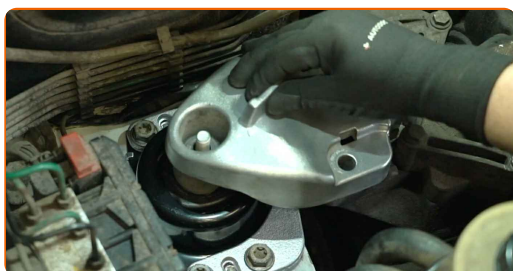

16

Screw in and tighten the engine mount fasteners to the car body. Use an 18 mm socket. Use a U-joint socket extension. Use a torque wrench. Tightening torque: 85 N·m.

17

Install the engine mount bracket.

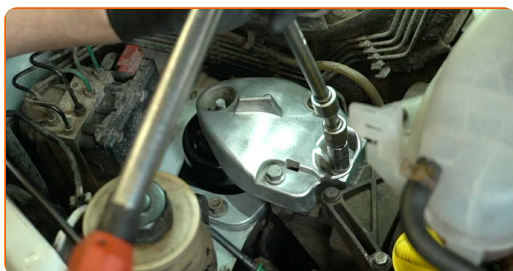

18

Install the fastening bolts.

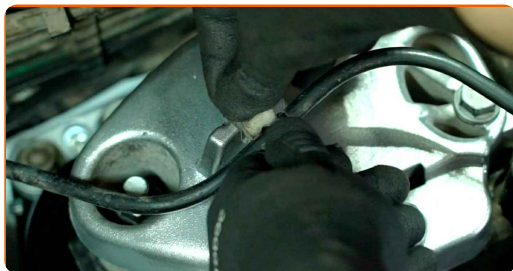

19

Screw in and tighten the engine mount bracket fasteners. Use a 16 mm socket. Use a U-joint socket extension. Use a torque wrench. Tightening torque: 44 N·m.

20

Secure the pipe on the engine mount bracket.

21

Remove the jack from under the engine.

Replacement: engine mounts – Renault Master 2 van. Professionals recommend:

- Lower the jack smoothly without jerking it to avoid damaging the vehicle assemblies and mechanisms.

22

Remove the fender cover.

23

Close the bonnet.

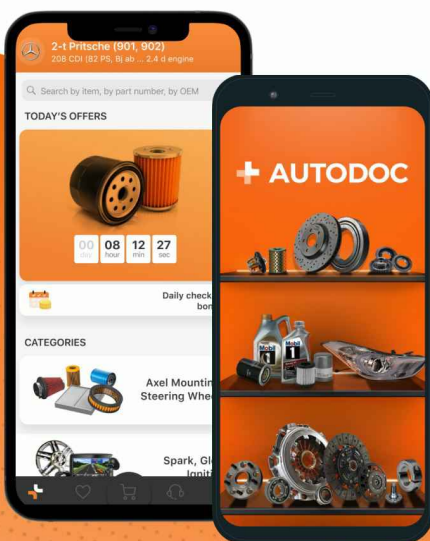

WELL DONE!
