Buy tools

Replacement: fuel filter – OPEL Sintra (APV). AUTODOC experts recommend:

- Ensure adequate ventilation of the workplace. Fuel vapors are poisonous.
- All work should be done with the engine stopped.

REPLACEMENT: FUEL FILTER – OPEL SINTRA (APV). USE THE FOLLOWING PROCEDURE:

1 Open the bonnet.

2 Use a fender protection cover to prevent damaging paintwork and plastic parts of the car.

3 Remove the cowl grille seal.

4 Remove the upper part of the scuttle panel.

5 Clean the fasteners of the lower part of the scuttle panel. Use WD-40 spray.

6 Unscrew the fasteners of the lower part of the scuttle panel. Use a drive socket #10. Use a ratchet wrench.

7 Remove the lower part of the scuttle panel.

8 Detach the fuel pressure sensor connector.

9 Clean the fuel filter housing and the cover. Use all-purpose cleaning spray.

10 Unscrew the fasteners of the fuel filter housing cover. Use Torx T30. Use a ratchet wrench.

11 Remove the fuel filter housing cover.

AUTODOC recommends:

- Be careful! Fuel may leak from the filter housing and hoses.

12 Prepare a container for fluids.

13 Remove the fuel filter.

14 Remove the old sealing ring.

15 Put the old filter cartridge in the container.

16 Install a new fuel filter.

Replacement: fuel filter – OPEL Sintra (APV). AUTODOC recommends:

- Make sure that the fuel filter is positioned correctly. Consider the fuel flow direction mark.
- During installation, take care to prevent dust and dirt from getting into the fuel filter housing.
- Take care to only use quality filters.

17 Install the new sealing ring.

18 Put the fuel filter cap back on.

19 Clean the fuel filter mounting bracket.

20 Tighten the fasteners of the fuel filter cover. Use Torx T30. Use a ratchet wrench.

21 Attach the fuel pressure sensor connector.

22 Reinstall the lower part of the scuttle panel.

23 Screw in the fasteners of the lower part of the scuttle panel. Use a drive socket #10. Use a ratchet wrench.

24 Reinstall the upper part of the scuttle panel.

25 Install the cowl grille seal.

Replacement: fuel filter – OPEL Sintra (APV). Tip:

- Before starting off, switch the ignition on and off several times. This should be done to activate the fuel pump to make it pump fuel through the fuel system.

- 26 Run the engine for a few minutes. This is necessary in order to make sure that the component operates properly.
- 27 Shut off the engine.
- 28 Remove the fender protection cover.
- 29 Close the hood.

Replacement: fuel filter – OPEL Sintra (APV). Tip from AUTODOC:

- To protect the environment from pollution, be sure to dispose of the used filters at special collection points.

WELL DONE!
