14 Remove the brake caliper.

Replacement: brake discs – Toyota RAV4 II. AUTODOC experts recommend:

- Tie the caliper to the suspension or to the body with a wire without disconnecting from the brake hose to prevent depressurization of the brake system.
- Make sure that the brake caliper is not hanging on the brake hose.
- Don't press the brake pedal after the brake caliper has been removed. As a result, the piston can fall out from the brake cylinder, and brake fluid leakage and depressurization of the system may occur.

Remove the rubber plug. Use a crowbar.

16

Release the parking brake adjuster. Use a flat screwdriver.
