Replacement: engine oil and filter – VOLVO V60 I (155, 157). AUTODOC experts recommend:

- Replace the oil filter every time when changing motor oil.
- Wear gloves to prevent contact with hot liquid.
- Use only new O-rings during installation.
- Please note: all work on the car – VOLVO V60 I (155, 157) – should be done with the engine switched off.

## CARRY OUT REPLACEMENT IN THE FOLLOWING ORDER:

1

Lift the car using a jack or place it over an inspection pit.

Replacement: engine oil and filter – VOLVO V60 I (155, 157). Tip from AUTODOC experts:

- The vehicle must be on even keel, and if it is at an angle, the drain plug must be at the lowest point.
- All work should be done with the engine stopped.

2

Put a waste oil container with at least 6 l capacity under the drainage hole.

**3** Unscrew the drain plug. Use a drive socket #17. Use a ratchet wrench.

**4** Drain the used oil.

**Replacement: engine oil and filter – VOLVO V60 I (155, 157). Tip:**

- Caution! The oil may be hot.
- Wait until the oil has completely drained from the drainage hole.

**5** Clean the area of the oil pan drainage hole.

**6** Screw in the new drainage plug and tighten it. Use a drive socket #17. Use a torque wrench. Tighten it to 28 nm torque.

**7** Clean the area of the oil pan drainage hole. Use all-purpose cleaning spray.

8 Lower the car.

9 Open the hood.

10 Use a fender protection cover to prevent damaging paintwork and plastic parts of the car.

11 Remove the engine cover.

**AUTODOC recommends:**

- Replacement: engine oil and filter – VOLVO V60 I (155, 157). Do not use excessive force when removing the part as this may damage it.

12 Unscrew the filter housing cap together with the old filter element. Use a drive socket #36. Use a ratchet wrench.

13 Prepare a container for the old oil filter.

14

Put the old oil filter in the container.

Replacement: engine oil and filter – VOLVO V60 I (155, 157). Tip from AUTODOC experts:

- Move up the container. The oil starts to drain out of the drainage hole immediately after you have removed the oil filter.

15

Detach the oil filter from the filter cover.

16

Remove the oil filter cover O-ring. Use a flat screwdriver.

17 Install a new O-ring to its mounting seat on the filter cover. Use a flat screwdriver.

18 Install the new oil filter to the mounting seat on the filter cover.

Please note!

- Make sure to install the filter correctly. Don't mix up the sides of the part.

19 Lubricate the rubber seal of the new filter with a little amount of fresh oil.

20 Clean the oil filter seat.

21 Install a new oil filter housing cover and tighten it. Use a drive socket #36. Use a torque wrench. Tighten it to 25 Nm torque.

22 Unscrew the oil filler plug.

23 Remove the oil filler cap.

24 Insert the funnel.

25 Pour oil into the engine through the filler. Required amount of oil: 5.9 L.

Replacement: engine oil and filter – VOLVO V60 I (155, 157). AUTODOC experts recommend:

- Use the oil recommended by the manufacturer.

26 Check the oil level using the dipstick. Top up oil if necessary.

Please note!

- The oil level should be between the Min and Max marks.

27 Install the oil filler cap.

28 Tighten the oil filler cap.

29 Run the engine for a few minutes. After the oil pressure warning light goes out, stop the engine.

30 Check the oil level 5 minutes after the stop of the engine operation using a dipstick and add oil if necessary.

Please note!

- The oil level should be between the Min and Max marks.
- Make sure that the oil filler cap is properly tightened.
- Check the threaded plug of the drainage hole and the oil filter seal for tightness. If necessary, carefully tighten them up.

31

Install the engine cover and secure it.

### AUTODOC recommends:

- Replacement: engine oil and filter – VOLVO V60 I (155, 157). To avoid damaging the part during installation, do not use excessive force.

32

Remove the fender protection cover. Close the hood.

### Replacement: engine oil and filter – VOLVO V60 I (155, 157). AUTODOC recommends:

- Note that oil pressure warning light, which indicates insufficient pressure in the lubrication system, may be on for a longer time than usual. After a few seconds, the oil will fill all the channels, and the light will go out.
- To protect the environment from pollution, be sure to dispose of the used filters at special collection points.
