

How to replace a spark plug on RENAULT CLIO II

Carry out replacement in the following order:

Use a torque wrench to replace spark plugs.

(i) AutoDoc recommends:

Disconnect the wire from the battery negative terminal.

Open the hood

Disconnect the high voltage wires from the spark plugs.

(i) AutoDoc recommends:

Note the correct procedure for connecting high-voltage wires to spark plugs.

Remove the spark plugs with a spark plug wrench and place them on a work surface in the order of installing in the engine.

Apply a thin layer of special grease on the thread surface of new spark plugs.

Screw new spark plugs and tighten them.

(i) AutoDoc recommends:

Be careful when working with a spark plug wrench. Its skewing can cause damage to the threaded connection.

Don't tighten the plugs with excessive force. Exceeding tightening torque can damage the thread connection.

Connect the high voltage wires to the spark plugs.

i AutoDoc recommends:

Follow the correct procedure when connecting high-voltage wires to spark plugs.

Close the hood
